

Blood Chem Iron Deficiency Action Steps

1. Use the PDF generator to create the iron repletion protocol handout with your clinic's branding so that you can share it with your patients.
2. Add the recommended supplements for treatment of iron deficiency, both Proferrin ES by Colorado Biolabs and grass-fed desiccated liver and spleen capsules from Ancestral Supplements, to your clinic's supplement list or to your electronic health record, and include dose instructions from this week so that you can easily provide these to your patients.
3. Add an iron panel, TIBC, and ferritin to your electronic health record so you can easily order it for patients. For example:
 - a. Markers with LabCorp test code
 - i. Iron panel: Code 83540
 - ii. TIBC: Code 83550
 - iii. Ferritin: Code 82728
