

# Blood Chem Impaired Kidney and Other Metabolic Patterns Action Steps

1. Add serum comprehensive metabolic panel (CMP), BUN, creatinine, sodium, and potassium to your electronic health record so you can easily order it for patients. For example:
  - a. Markers with LabCorp test code
    - i. CMP: Code 80053
    - ii. BUN: Code 84520
    - iii. Creatinine: Code 82565
    - iv. Sodium: Code 84295
    - v. Potassium: Code 84132
2. Print out or download the list of botanicals, which contains substances that people with kidney disease need to limit, so that you can easily access it as a reference.
3. Add serum uric acid and creatine kinase to your electronic health record so you can easily order it for patients. For example:
  - a. Markers with LabCorp test code
    - i. Uric acid: Code 84550
    - ii. Creatine kinase: Code 82550
